This is going to be a very busy week for book announcements. We'll have something coming from Wizard's Tower tomorrow, and an anthology I have a story in is being published on Thursday. Before that, however, there is this book.

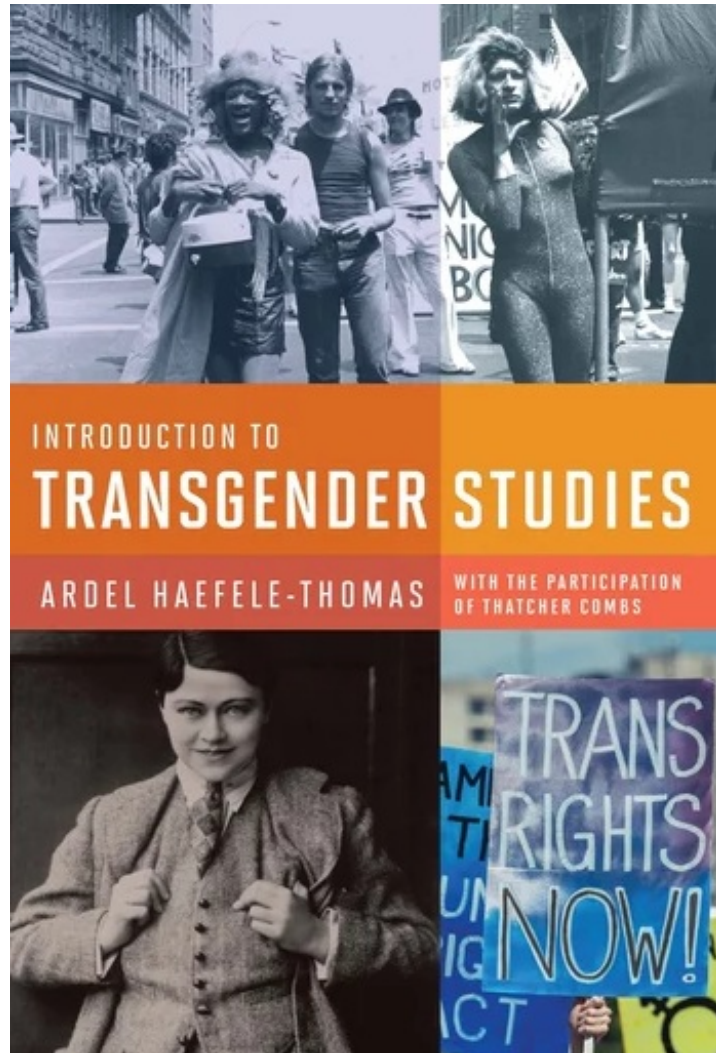

As you can see, it is not by me, but I do have a short essay in it. The book covers a wide range of trans issues, including history. I get to write about transgender Romans. In a proper university text book. How cool is that?

Huge thanks should go to Ardel for including me.

We met at the Moving

Trans History Forward conference in Victoria, BC in 2016. As Ardel teaches in San Francisco, Kevin and I immediately bonded with them. We were all there again last year, and this year Ardel is over my side of the pond. We'll both be on a panel about trans history at the [Outing the Past academic conference](#) at the end of March.

Anyway, enough about us. You want to know about the book. It is available now in the USA. It is very reasonably priced for an academic textbook. And you can get 30% off with the special offer mentioned [here](#). UK people, you can

probably buy from the publisher too, but postage may be an issue. The paperback won't be available here until March 5th, but the Kindle edition is available now.
